General Internal Medicine: Meeting the Promise of Tomorrow

The SGIM23 annual meeting theme reflects on the fundamental changes that our field and our colleagues have experienced as a result of the COVID-19 pandemic. As physicians, we continue to navigate changes in how we prepare our trainees, how we care for our patients, and how we gather, translate, and implement the evidence that informs our patient care and education. General internists must take a leadership role in innovation in research, education, and clinical practice and, in so doing, advance policies aimed at improving the health of our patients and communities.
